

OLD MODEL

30 days
just to mobilize.

- Signal appears
- Org notices late
- Alignment meetings begin
- Window already closing

"Most organizations lose before they start coordinating."

4 complete in 12 minutes. Stages 5-6 are the actual work that follows.

NEW MODEL

Most organizations lose before  start coordinating.

THE REAL PROBLEM

The cost is late detection,
not late effort.

RESULT · Even maximum effort cannot recover time lost to late detection + alignment delay.
"The window closes before the organization aligns."

Readiness OS gives signal advantage *before execution advantage.*

Stage 1 of 2

SIGNAL ADVANTAGE

See the situation forming — before it becomes a crisis. Customer-defined triggers, 248+ monitored signals, every 15 minutes.

- 248+ signals monitored
- 221 customer-defined triggers
- Every 15 minutes, continuously

THEN

Stage 2 of 2

EXECUTION ADVANTAGE

When a signal crosses a threshold, every function knows exactly what to do — in 12 minutes, not 30 days.

- 170 protocols pre-staged
- 12-minute full execution
- Executive authorization at every gate

"The response is ready before the trigger fires."

01 TRIGGERED

Signal threshold crossed – Readiness Protocol pre-staged and system-deployed.

02 STAGED

Tasks created, roles assigned, stakeholders identified.

03 NOTIFIED

All stakeholders alerted – Teams, email, or SMS.

04 ACKNOWLEDGED 12 MIN

Role-holder confirmed receipt and accepted their task.

05 IN PROGRESS

The role-holder is actively performing the assigned work.

2 MONITORING ACTIVE

20 LIVE ALERTS

Deliverable confirmed and verified by the role-holder.

● **Command Tower** – Live executive display. Monitors signals continuously, surfaces trigger detections, and tracks Readiness Protocol activations. No action executes without executive authorization.

FOUR CHOICES AT EVERY GATE:
AUTHORIZE ?
STAND DOWN ?
DELEGATE ?
DEFER ?

— ACTIVATION CENTER —

Live Readiness Protocol Engagement

Select a strategic scenario. Roles assigned. Communications sent — execution is live.

● **SYSTEM RECOMMENDATION**
Protocol matched to detected signal

● **12 MIN TO LIVE EXECUTION**
Pre-staged. Roles assigned at auth.

● **10 STAKEHOLDERS · 12 TASKS**
Pre-identified, pre-briefed

● **EXECUTIVE AUTHORIZATION**
Human sign-off required at every gate

● **GROWTH & POSITIONING** ⌚ 12 min to live execution

M&A Day 1 Integration

Coordinate Day 1 integration across all business units with synchronized stakeholder communication and task execution.

IMPACT SCOPE
👥 10 Stakeholders ⌚ 12 Tasks

AI monitors. Executives authorize. No action without sign-off.

THE 12-MINUTE EXECUTION CHAIN

The response is received
before the trigger fires

● **ROLES ASSIGNED**
Every position pre-identified, pre-briefed

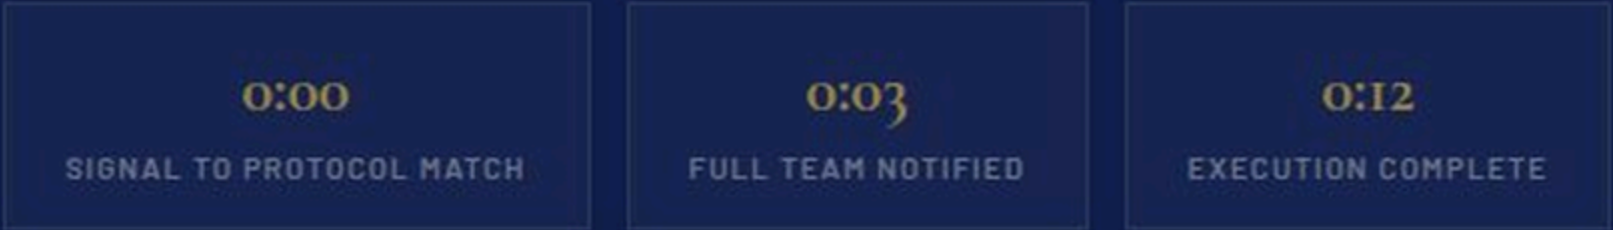

● **TASKS SEQUENCED**
Critical path pre-staged, not improvised

● **COMMS SENT**
All stakeholders alerted simultaneously

● **BUDGET ACTIVATED**
Pre-allocated authority released on auth

While competitors spend 30 days figuring out who needs to be in the room, every task is pre-staged, every stakeholder is mapped, every budget authority is pre-approved. Watch exactly how 12 minutes replaces 30 days.

This is the animated walkthrough – watch the chain execute. Want to run the scenario yourself? [Try the Interactive 12-Minute Test Drive →](#)

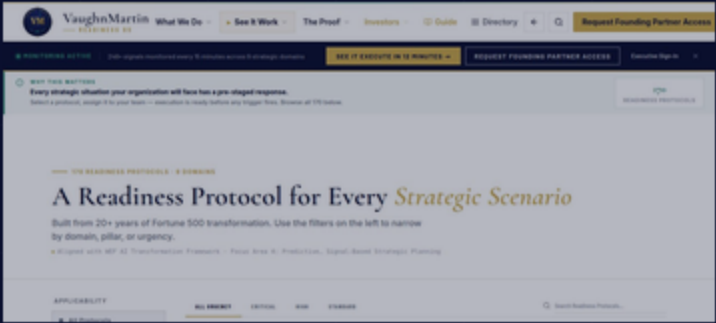

When authorized, coordination starts instantly across every function.

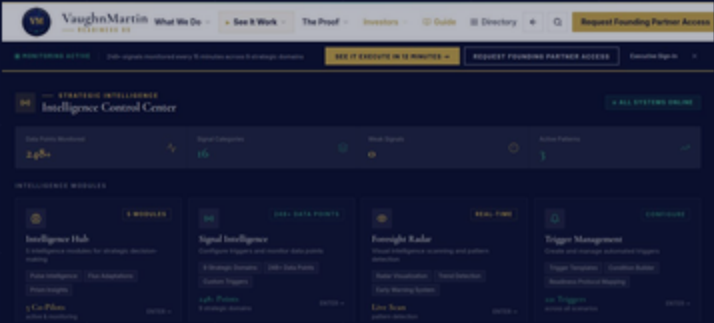

THE FULL ARCHITECTURE · 5 STAGES

Full operating architecture.

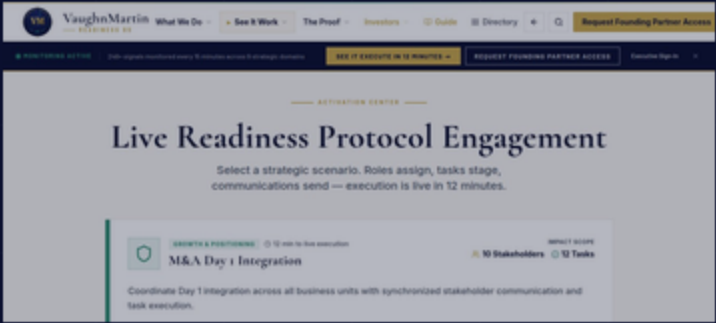

Not a point tool.

Identify every strategic situation your org may face, is facing, or has faced.

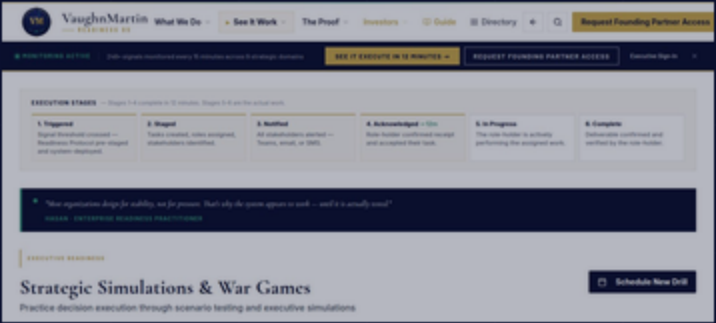

Customer-defined triggers across 248+ signal sources, every 15 minutes.

Executive authority gates every activation. Four choices. Human control.

Roles, tasks, comms, and budget coordinate in 12 minutes after authorization.

+18% readiness per cycle. Every activation encodes what worked.

"This is the response model enterprises have never had."

THE LEARNING LOOP

- **Activation Occurs**
Trigger fires, protocol deploys
- **Outcomes Logged**
What worked, what needed adjustment
- **Pattern Updated**
Signal weights refined automatically
- **+18% Readiness**
Next activation is faster and better

EXECUTION STAGES — LIVE IN PRODUCT

minutes across 9 strategic domains

SEE IT EXEC

Most organizations don't fail because they can't act — they fail because they see the signal too late. Readiness OS lets you define the triggers, thresholds, and escalation paths for every critical scenario so leadership decides in time, not after the fact. Detect earlier, on your terms. Execute in minutes. Improve every cycle.

Detect on your terms — so you don't find out after the window has closed.

vaughnmartin.com/founding-partner

"If advantage belongs to teams that see earlier and act decisively — partner with us."
