## WHY THIS MARKET OPENS NOW

#### AI REMOVED THE OLD BOTTLENECK

Information processing is no longer the constraint. The coordination model is. Every enterprise now has AI — none have the operating model to use it under pressure.

#### REGULATORY COMPLEXITY RISING

SEC, GDPR, FDA, DOJ — the cost of late improvised response grows annually. Pre-staged protocols are now demanded by regulators themselves.

#### THE MICROSOFT DISTRIBUTION LAYER

"Every enterprise has Microsoft's AI stack. None have the operating model to use it." Readiness OS is the missing layer above that investment.

**\$0 IN THIS LAYER TODAY — NO VENDOR OWNS IT YET**

\* TAM: 47,000 enterprises with \$100M+ annual revenue (Sun & Bradstreet Global Business Database 2024) × \$150K VaughnMartin ACV = \$7.05B addressable. \$10.2M annual exposure estimate: VaughnMartin analysis (\$1.7M illustrative mobilization cost × conservative 6 strategic events/yr), 15-20 situations/yr; VaughnMartin catalog of 180 documented trigger categories across 9 domains.

## WE DON'T COMPETE WITH SOFTWARE TOOLS. WE REPLACE THE 40-YEAR-OLD MEETING-HEAVY OPERATING MODEL.

#### TARGET CUSTOMER

## C-SUITE AND PMO AT ORGANIZATIONS THAT CANNOT AFFORD TO IMPROVISE.

#### ECONOMIC BUYER

### COO · CSO · CFO GENERAL COUNSEL

Accountable when mobilization fails. They've paid the cost of being unprepared — regulatory fine, proxy fight concession, breach penalty. They understand the ROI without a spreadsheet.

#### OPERATIONAL CHAMPION

### PMO DIRECTOR · CHIEF OF STAFF

The preparation architecture owner. Directly reduces the coordination burden they carry today. Owns the go-live path and ongoing protocol maintenance rhythm.

#### FIRMOGRAPHIC ICP

→ 500-50,000 employees

→ Regulatory, competitive, or operational exposure as a material risk factor

→ Already Invested in Microsoft's AI stack — no operating model to use it under pressure

→ Experienced at least one mobilization failure in the last 24 months

*"The economic buyer has already paid for a mobilization failure. They're not evaluating Readiness OS against doing nothing — they're evaluating it against the last 30 days they'll never get back."*

#### THE FOUNDER

## Martin Brunke

FOUNDER & CEO · VAUGHNMARTIN · READINESS OS

#### THE ORIGIN OF THE INSIGHT

*Five years on the Stanford Cardinal sideline. 60–80 decisions in 3 hours. Every response pre-staged before the game started. When the situation changed at the line of scrimmage — no timeout, no alignment cycle. Eleven people pivoted in 40 seconds because the system was built before the pressure arrived. Then I walked into corporate America and watched the same trigger take 30 days.*
