Waypoint Analytics board authorizes sale process — LOI exclusivity closes in 14 days

RISK 88/100 — HIGH

Apex Capital's board member receives a confidential text at 6:44 PM: Waypoint Analytics has authorized a formal sale process. Their strategic fit score with Apex has been pre-modeled at 94%. Three other strategic buyers — including a known competitor — have already been contacted. Exclusivity goes to the first credible LOI. In the old model, assembling the deal team, running a financial model, and clearing legal conflicts takes three weeks. The window closes in 14 days.

12 MIN

Full Execution Cycle

"Bolted AI onto the old model"

- ✗ Faster summaries from the same slow meeting
- ✗ Smarter notes. Same 30-day mobilization cycle.
- ✗ AI tools. No operating model change.
- ✗ Competes with Copilot. We don't.

"Rebuilt the operating model"

- ✓ Pre-staged before any trigger fires
- ✓ Proprietary IDEA Framework — 3 years to build
- ✓ Orchestrates the Microsoft stack — doesn't replace it
- ✓ Competes with the 40-year-old meeting model

Signal detected → Protocol activates → Executive authorizes → 12 minutes

— THE 12-MINUTE EXECUTION CHAIN —

The response is ready before the trigger fires.

While competitors spend 30 days figuring out who needs to be in the room, every task is pre-staged, every stakeholder is mapped, every budget authority is pre-approved. Watch exactly how 12 minutes replaces 30 days.

This is the animated walkthrough — watch the chain execute. Want to run the scenario yourself? Try the Interactive 12-Minute Test Drive →

\$120K

Platform Cost · Annual

Replaces \$400K–\$800K consulting retainer

Break-even before the 2nd activation.

The budget line already exists.

"We're replacing a line item every Fortune 1000 already pays."

The screenshot shows the VaughnMartin website's ROI Calculator interface. The header includes the VaughnMartin logo, navigation links (What We Do, See It Work, The Proof, Investors, Guide, Directory), and a search bar. A secondary navigation bar displays 'MONITORING ACTIVE' with a status of 248+ signals monitored every 15 minutes across 9 strategic domains, a 'SEE IT EXECUTE IN 12 MINUTES' button, a 'REQUEST FOUNDING PARTNER ACCESS' button, and an 'Executive Sign-In' link. The main content area features the heading 'The Competitive Window *You're Leaving Open*' with the subtext 'Every hour between signal detection and execution is a window your competitor can use. Quantify exactly what closing that gap — from 30 days to 12 minutes — means for your enterprise.' Below this, the 'ORGANIZATIONAL PROFILE' section shows 'Company Size' set to 'Enterprise (5K-25K employees)'. To the right, a box displays the 'ESTIMATED ANNUAL VALUE' as '\$61.3M' with the text '30 DAYS → 12 MIN · 3,600× EXECUTION HEAD START' below it. The footer states 'ROI CALCULATOR · ESTIMATES \$61.3M+ ANNUAL VALUE · 3,600× EXECUTION HEAD START'.

Preparation infrastructure does not exist yet.

*That's not a problem.
That's the entire opportunity.*

Every Fortune 1000 has Microsoft's AI stack. None have the operating model to use it at trigger speed.

The screenshot displays the VaughnMartin website, which is a platform for strategic readiness protocols. The header includes the company logo, navigation links like 'What We Do', 'See It Work', 'The Proof', 'Investors', 'Guide', and 'Directory', and a prominent 'Request Founding Partner Access' button. A secondary navigation bar shows 'MONITORING ACTIVE' with a status of '248+ signals monitored every 15 minutes across 9 strategic domains', a 'SEE IT EXECUTE IN 12 MINUTES' button, another 'REQUEST FOUNDING PARTNER ACCESS' button, and an 'Executive Sign-In' link.

The main content area features a section titled 'WHY THIS MATTERS' with the text: 'Every strategic situation your organization will face has a pre-staged response. Select a protocol, assign it to your team — execution is ready before any trigger fires. Browse all 170 below.' To the right of this text is a badge indicating '170 READINESS PROTOCOLS'.

Below this, a sub-header reads '170 READINESS PROTOCOLS · 9 DOMAINS'. The main heading is 'A Readiness Protocol for Every Strategic Scenario', followed by the text: 'Built from 20+ years of Fortune 500 transformation. Use the filters on the left to narrow by domain, pillar, or urgency.' A note mentions 'Aligned with WEF AI Transformation Framework · Focus Area 4: Predictive, Signal-Based Strategic Planning'.

The interface includes a filter section on the left under 'APPLICABILITY' with options for 'All Protocols', 'General (Cross-Industry)', 'Financial Services', 'Technology', and 'Manufacturing'. At the top of the main content area, there are tabs for 'ALL URGENCY', 'CRITICAL', 'HIGH', and 'STANDARD'. A search bar is located on the right with the placeholder 'Search Readiness Protocols...'. The main content area states 'Showing 170 of 170 Readiness Protocols' and includes a call to action: '3 FULL READINESS PROTOCOL PREVIEWS — NO SIGN-IN REQUIRED'. It also mentions 'See the full depth of what a deployed Readiness Protocol contains — trigger logic, stakeholders, tasks, and budget authority.' At the bottom of the page, a dark banner reads '170 READINESS PROTOCOLS · A PRE-STAGED RESPONSE FOR EVERY STRATEGIC SCENARIO'.

Twelve organizations. One first cohort.

We're not looking for customers.

We're selecting partners who will define the category.

WHY THIS ROOM

Investors who see the category before the category exists

Three sentences. That's the whole pitch.

PROBLEM

Enterprises detect more signals, but still mobilize too slowly.

SOLUTION

Readiness OS pre-stages response so executives authorize in minutes.

OUTCOME

Earlier detection + faster execution protects value before the window closes.
