Regulatory Inquiry · 87%

These are live signal detections. Production. Right now.

THE REALITY

30

Days

That's not execution time.

That's mobilization time before execution begins.

THE OLD MODEL — EVERY TIME

- **Trigger fires**
Signal detected — no protocol exists. Emails go out.
- **Days 1–5: Who's in the room?**
Executives align on who should lead.
- **Days 6–14: What's the plan?**
Strategy formed. Consultants engaged.
- **Days 15–25: Alignment cycle**
Stakeholders aligned. Approvals queued.
- **Day 30+: Execution begins**
After 30 days of coordination. If you're lucky.

THE PROBLEM IS ALREADY HERE

EVERY OTHER VENDOR

"Bolted AI onto the old model"

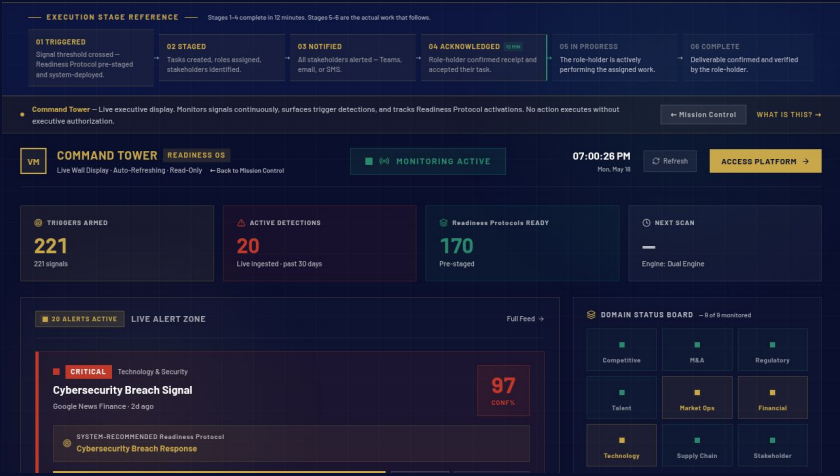

- ✗ Faster summaries from the same slow meeting
- ✗ Smarter notes. Same 30-day mobilization cycle.
- ✗ AI tools. No operating model change.
- ✗ Competes with Copilot. We don't.

VAUGHNMARTIN

"Rebuilt the operating model"

- ✓ Pre-staged before any trigger fires
- ✓ Proprietary IDEA Framework — 3 years to build
- ✓ Orchestrates the Microsoft stack — doesn't replace it
- ✓ Competes with the 40-year-old meeting model

The preparation architecture that exists before the trigger fires

Preparation infrastructure does not exist yet.

*That's not a problem.
That's the entire opportunity.*

WHY NOW · WHY VAUGHNMARTIN

- 01** Every Fortune 1000 has Microsoft's AI stack. None have the operating model to use it at trigger speed. Readiness OS is the layer above.
- 02** The category doesn't exist yet. First-mover advantage in preparation infrastructure is the same position ERP held in the 1990s.
- 03** Enterprise AI budgets are growing. The operating model gap is growing faster. That gap is our product.
- 04** We built the IDEA Framework — 170 protocols across 3 years. Not recreatable in a product cycle. A structural moat.

Twelve organizations. One first cohort.

*We're not looking for customers.
We're selecting partners who will define the category.*

WHY THIS ROOM

Investors who see the category before the category exists

PROBLEM

No preparation infrastructure exists. Strategic triggers arrive in real time — the mobilization cycle still averages 30 days.

SOLUTION

We rebuilt the operating model. Pre-staged execution replaces real-time coordination — 12 minutes, not 30 days.

ROI

At \$120K, we replace a \$400K–\$800K retainer. Break-even before the second activation. The budget line already exists.
