

— STRATEGIC ADVANTAGE PLATFORM · FORTUNE 1000

VaughnMartin Readiness OS

Signal advantage before
execution advantage.

SWIPE TO SEE HOW →

— THE PROBLEM

The window closes before the organization aligns.

DETECTION GAP

Most organizations find out about strategic situations AFTER the optimal window has moved. Signals unmonitored · Thresholds undefined · No early warning architecture

MOBILIZATION GAP

Even when detected, the first 30 days are spent figuring out who decides, who funds, and who acts. Who owns response

- Who can decide • What gets funded • Who notified

RESULT · Find out late. Mobilize slowly. The best window is often gone.

— THE ADVANTAGE

See it earlier. Execute in 12 minutes.

- Earlier signal detection across customer-defined triggers
- Faster authorized execution using pre-staged protocols
- Readiness that compounds with every activation cycle

PROTOCOLS

9

DOMAINS

"Speed matters, but timing matters first."

— THE PRODUCT SYSTEM · 5 STAGES

Map → Monitor → Decide → Execute → Learn

MAP

Situations faced, facing, may face — defined before pressure arrives

MONITOR

Trigger & alert architecture on your terms. 248+ data points, every 15 min.

DECIDE

Executive authority at every gate. Four choices including Stand Down.

EXECUTE

Roles, budgets, PR, comms, tasks — coordinated in 12 minutes.

LEARN

+18% readiness per cycle. Every activation encodes what held.

"This is full operating architecture, not a point solution."

— GOVERNANCE · TRUST · CONTROL

AI monitors. Executives authorize.

SIGNAL INTELLIGENCE

System surfaces patterns, signal scores, and threshold alerts across 248+ data points — every 15 minutes.

EXECUTIVE AUTHORITY

Humans retain all decision rights. No action deploys without explicit executive authorization.

BOARD-READY AUDIT

Every activation, decision, and outcome is logged, timestamped, and exportable for board and compliance.

"We accelerate decision quality without surrendering control."

— THE PROOF · REAL OUTCOMES

Same trigger. Entirely different outcome.

RANSOMWARE Without: \$47M in regulatory penalties · Customer notification: Day 14 With: \$0 in penalties · Systems isolated in 12 min · Notification in 4 hours	\$14B COMPANY
ACTIVIST INVESTOR Without: Board seat conceded · Stock -11% With: No concessions · +4% stock recovery · Company led the narrative	\$28B COMPANY
SUPPLY CHAIN COLLAPSE Without: \$47M production losses + \$12M customer penalties · 7 weeks disruption With: \$0 losses · \$0 penalties · Continuity maintained · 0 days disruption	\$8B COMPANY

"Same trigger. \$47M in penalties or \$0. The only variable: pre-staged response."

— LIVE IN PRODUCTION · TESTABLE NOW

Production platform with guided onboarding is live.

- Public product and onboarding flows are active
- Users move from discovery to first guided execution path
- Core surfaces accessible for evaluation, demos, and partner onboarding
- Live at vaughnmartin.com — no sign-in required to begin

TRY THE 12-MINUTE TEST DRIVE →

vaughnmartin.com/12-minute-experience

"This is live, testable software, not slides-only."

THE TIMING

Volatility increased. Reaction models did not.

Higher signal volume

More situations, faster cycle times, fewer clear response windows

Tighter decision windows

The gap between signal and consequence is compressing across every domain

Greater cross-functional complexity

More stakeholders, more authority layers — running on a 30-day coordination model

"The environment modernized. The operating model didn't."

— DIFFERENTIATION · THE MOAT

Not just faster response — better operating model.

- **Full lifecycle**

Detection through learning — not just execution speed

Customer-defined triggers

Architecture built on your terms, not generic templates

- **Authority-aware design**

Pre-assigned decision rights — no alignment delay at trigger point

● Compounding readiness

Every activation encodes what held. +18% improvement per cycle.

"This is durable infrastructure, not campaign software."

— THE ASK

Partner with us to scale Readiness OS.

RAISING	Up to \$1,000,000
PARTNERS	12 Founding Partners · \$75K-\$250K/yr · 90-day validation
USE OF FUNDS	Product hardening · Enterprise controls · Founding Partner GTM

THE RESPONSE IS READY BEFORE THE TRIGGER FIRES.

"If your thesis is that advantage belongs to organizations that see earlier and execute decisively — we should talk."
